

Our growing company is hiring a Red Seal Certified Refrigeration Technician to lead our residential heat pump division. The successful applicant's duties will include installation and service of both ductless and ducted heat pumps (air and water source).

### About Good Air

Good Air Ventilation Systems Inc. has provided residential and commercial ventilation solutions in HRM for over 15 years. We specialize in the installation and servicing of heat pumps, air exchangers, range hoods, bathroom fans and more.

From our experienced technicians to our friendly customer-facing staff, we aim to provide a supportive, inclusive and fun organizational culture. We offer flexible scheduling and supportive management that facilitates work-life balance. We also strive to build a diverse team with members from different genders and nationalities, plus we offer a competitive salary.

### Duties

- Install, troubleshoot and repair central and mini-split heat pump systems
- Upload notes to customer management software
- Communicate with office staff to effectively coordinate HVAC installation and service
- Maintain a reliable schedule to ensure jobs are completed on time

### Qualifications and Skills

- Red Seal Refrigeration Certificate required
- Heat pump installation experience is an asset but not required
- Basic hand tools (specialty tools will be provided)
- Ambitious and self-starting
- Strong problem solving and troubleshooting abilities
- Meticulous attention to detail
- Friendly and able to provide a positive customer experience
- Punctual and keen to learn
- Team player

### Benefits

- Competitive wage based on qualifications and experience
- Full-time, permanent position
- Health, dental and vision benefits
- Company Vehicle
- Company Cell Phone
- Paid Vacation

### Compensation

\$30 - \$45/hour based on experience. We'll pay well for the right tech who wants to grow with the company!
